2 INVITATION'S TERMS

1. The agreement will include parts and labor for the maintenance & repair of the aforementioned industrial computers¹. All hardware provided by the manufacturer as part of the unit will be covered by the in subject agreement.
2. All spare parts used will be genuine or officially approved by the manufacturer.
3. The contractor has the obligation to repair all hardware failures at no additional cost, excluding those caused by PPA's fault.

4. The contractor shall include in their financial offer a pricelist of the services and the spare parts needed for all common repairs (indicatively mainboards, touchscreen, HDD, ram unit), so that PPA will be aware of the additional cost in cases where the hardware failure is caused by PPA's fault.
5. The repair time shall not exceed 15 business days, counting from the day that the device was delivered to contractor's premises. If more than one device is delivered to the contractor, the repair time for only one of them may exceptionally be extended up to 30 working days.
 - a. In that case and should the repair time exceed the period of 30 working days, the contractor shall return to PPA the 50% of the annual cost of maintenance of the device by a credit invoice.
 - b. In that case and should the repair time exceed the period of 50 working days, the contractor shall return to PPA the 100% of the annual cost of maintenance of the device by a credit invoice.
 - c. The annual cost of maintenance per device shall be mentioned in contractor's financial offer.
6. If a device cannot be repaired the contractor has the obligation to replace the unit by one of equivalent or higher technical specifications with no extra cost (new or refurbished). In case of replacement with refurbished, PPA will check the device and keep the right to refuse the replacement in case the refurbished device is not in good condition.
7. PPA owns twenty-eight (28) more devices model TPC-1251T-E3AE+ and fifteen (15) model TPC-1251T-E3BE+. Contractor undertakes the responsibility to provide repair services for these devices also based on the pricelist provided in their offer. Repair services for the specific VMTs will be provided over and above the maintenance fees based on the agreed pricelist and maximum repair time that bidder will include in their offer.
8. PPA affirms that all devices included in the contract will be operational at the time that the contract will come into force. Contractor is free to check onsite the status of the devices that aren't in production operation before the signing of the contract. Any devices found to be needing repair will be charged additionally to the maintenance fee based on the contractor's provided pricelist.

Currently approximately 80% of the devices are installed on PPA yard machinery and are in production operation and the remaining are kept in buffer stock.

PPA will provide a status report of all fifty (50) VMT before the signing of the contract.
9. The devices will be returned to PPA accompanied by a service report describing the services provided and the hardware parts that were replaced.
10. The devices will be delivered to contractor and be returned to PPA S.A. at contractor's means and expenses (DDP Terms).
11. OS support and ram mounts are not included in the scope of the maintenance contract.
12. Contract duration: Two (2) years.
13. Payment terms: 50% after the signing of the contact and two (2) payments of 25% at the end of the 3rd and the 12th month of the contract.

Note¹ The antennas are not used anymore.
