**SUBJECT:** Extension and clarifications regarding the repetitive tender for the procurement of Verified Gross Mass (VGM) systems for Rail Mounted Gantry (RMG) Cranes and Straddle Carrier (SC) Cranes, situated in Pier I Container Terminal of Piraeus Port Authority S.A.

Interested parties are kindly requested to refer to all clarifications published provided by PPA, in relation to the subject tender.

**Question 1:**

*"..... In relation to attached tender, we have seen that is exactly the same that last time ....*

*The difference in our offer regarding your tender is that we are offering a pin type load cell for SCs instead of annular load cell type since accordingly to our experience it works better. Please confirm that is acceptable.*

*The other point that I desire to clarify is that our system is prepared to be integrated with CATOS as indicated. However, I don't know if you desire integration with CATOS performed in those works (and included in our offer)."*

**Answer 1:**

1. We can accept pin type.
2. The supplier must fully integrate his/her system with CATOS in cooperation with PPA IT engineers.

**Question 2:**

*"..... We write you to ask for a deadline extension since we need some extra days, due to Easter holidays, in order to collect all the necessary documents and give you a complete and appropriate propose for you.*

*We are waiting for your decision, hoping that you could extend the deadline for at least 5 days. "*

**Answer 2:**

Please be informed that an extension has been granted for the subject tender until 17.05.2021 at 16:00.
